REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
740819-617

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,117,700, granted September 12, 2000, and for which a reissue patent is sought on the invention entitled METHOD FOR FABRICATING SEMICONDUCTOR DEVICE HAVING GROUP III NITRIDE

the specification of which

- ☒ is attached hereto.
- ☐ was filed on _____ as reissue application number _____ / _____
and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below.
(Check all boxes that apply.)

- ☐ by reason of a defective specification or drawing.
- ☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.
- ☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The original patent claims less than I had a right to claim due to the fact that specific methods also disclosed in the original patent application were not fully appreciated and, therefore, no claims directed to these methods were presented. In particular, I did not fully appreciate the significant aspect of my invention which discloses a method for fabricating a semiconductor device, comprising the steps of forming a semiconductor layer of a Group III nitride containing a dopant over a substrate, as well as other steps to make the conductivity type of the semiconductor layer p-type. For instance, I did not fully appreciate the significant aspect of my invention which discloses a method of applying RF power on the semiconductor layer. I also did not fully appreciate the significant aspect of my invention which discloses a method comprising the step forming a p-side electrode out of a metal on the semiconductor layer, and applying RF power on the semiconductor layer. In addition, I also did not fully appreciate the significant aspects of my invention which discloses a method comprising the step of charging plasma into the vacuum chamber to form an ambient of plasma while keeping the temperature of the substrate at about 600°C or lower after introducing the substrate into a vacuum chamber. Finally, I further did not fully appreciate the significant aspects of my invention which discloses a method comprising the steps of forming a p-side electrode out of a metal on the semiconductor layer, and after introducing the substrate into a vacuum chamber, charging plasma into the vacuum chamber to form an ambient of plasma while keeping the temperature of the substrate at about 600°C or lower. The issued claims 1-15 of the present patent fail to claim these methods. Therefore, the original patent claimed less than I had a right to claim and have a narrower scope of protection. The above described methods and dependent variations thereof supported in the original patent are now claimed in added claims 16 to 43 of the subject reissue application.
